How to Import Blocked Senders and Safe Sender Lists from ProofPoint to Microsoft 365

To transfer block/safe lists from your personal ProofPoint to Microsoft 365, please refer to the steps below for your reference!

Exporting Blocked Senders/Safe Senders lists to a Notepad document:

- 1. Log in manually at https://00325001.pphosted.com:10020
- 2. Enter your email address and password
- 3. Click Lists at the bottom left of the page
- 4. Click Blocked Senders, then highlight and copy all the emails within your Blocked Senders list
 - a. You can highlight all the emails that are in your Blocked Senders list by clicking and dragging your mouse from the top of the list down to the bottom
 - b. Afterwards, right click on the highlighted emails, then select Copy

	New Z Edit X Delete Delete Options → Username:	Successfully			
Lists	Blocked Senders List				
My Lists	Please specify e-mail address or Internet domain to add to Blocked Senders List				
Image: Safe Senders List (0) Image: Safe Senders List (8)	Save Close				
	Email Address ▲ spamemail Address ▲ spamemail Address ▲ spamemail Qdomain.com spamemail Qdomain.com spamemail Qdomain.com spamemail Qdomain.com				
	spamemail5@domain.c Copy spamemail6@domain.c Copy spamemail7@domain.c Copy link to highlight spamemail8@domain.c Search Google for "spamemail1@domain.com spamemail2@domain.com" Print	Ctrl+C Ctrl+P			
	Inspect				

5. After copying the blocked emails, open the **Notepad** application via Windows Search

6. On the Notepad application, right click on the blank document, then select Paste

7. Next, select **File > Save as**, and name the file **Blocked Senders List**, then save the file somewhere accessible for later!

- 8. You can then repeat the same steps for your Safe Senders List!
 - IMPORTANT *** Keep in mind, we do not recommend using email overrides (Safe Senders Lists) since exceptions to spam filtering CAN open up your organization to attacks and INCREASE security risk regardless of Microsoft Defender's security coverage! ***
 - i. More info about this here: <u>https://learn.microsoft.com/en-us/microsoft-</u> <u>365/security/office-365-security/create-safe-sender-lists-in-office-</u> <u>365?view=o365-worldwide</u>

Importing Blocked Senders Lists to Outlook Desktop App!

- 9. Navigate to the Outlook Desktop (ODA) App
- 10. Under the **Home** panel, select the button marked as **Junk**.

11. In the drop down, select Junk E-mail Options

- 12. In the Junk Email Options window, select the Blocked Senders tab
- 13. Select **Import from File**, then locate the previously created Blocked Senders List document, select it, then click on the **Open** button

unk Emai	l Options - antl	nony.lam@nc.go	v	>	
Options	Safe Senders	Safe Recipients	Blocked Sender	International	
Email from addresses or domain names on your Blocked Senders List will always be treated as junk email.					
(Add	
				Edit	
				Remove	
				nport from File Export to File	
		ОК	Cancel	Apply	

14. After clicking on the **Open** button, your Blocked Senders List should now populate within Outlook, to which you can then finalize the import by selecting the **OK** button!

Junk Email O	ptions - antł	nony.lam@nc.go	v	×
