

Right Ballot to Right Voter

An opportunity to make every vote count

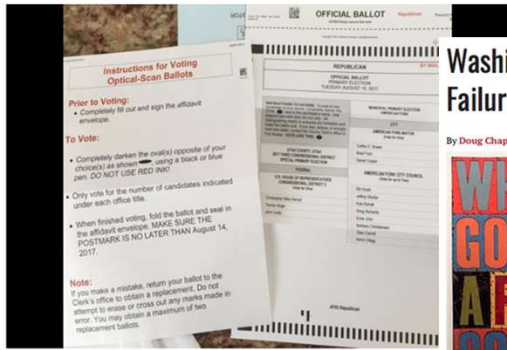

Learnings

- The GIO or equivalent is an important partner of a state election director.
- State election directors are more aware of GIS and see the value of the technology for election data management and administration.
- States are budgeting for geo-enabled elections.
- NSGIC is a trusted source for integrating GIS and elections.
- Voter Registration Systems must be built on geographic information systems.

Audit of 3rd District primary shows weaknesses in election process
