

# AddressNC

**Anna Verrill, GISP**  
**AddressNC Project Manager**

Statewide Mapping Advisory Committee  
April 15, 2020

# AddressNC Update

- **Full statewide update is tied to Next Generation 911 project.**
- **Slight delays in timeline due to COVID19 impacting Next Generation 911 schedule.**
- **Reassessment of AddressNC scope, milestones, and timelines will occur over next couple months.**

# National Address Database Update

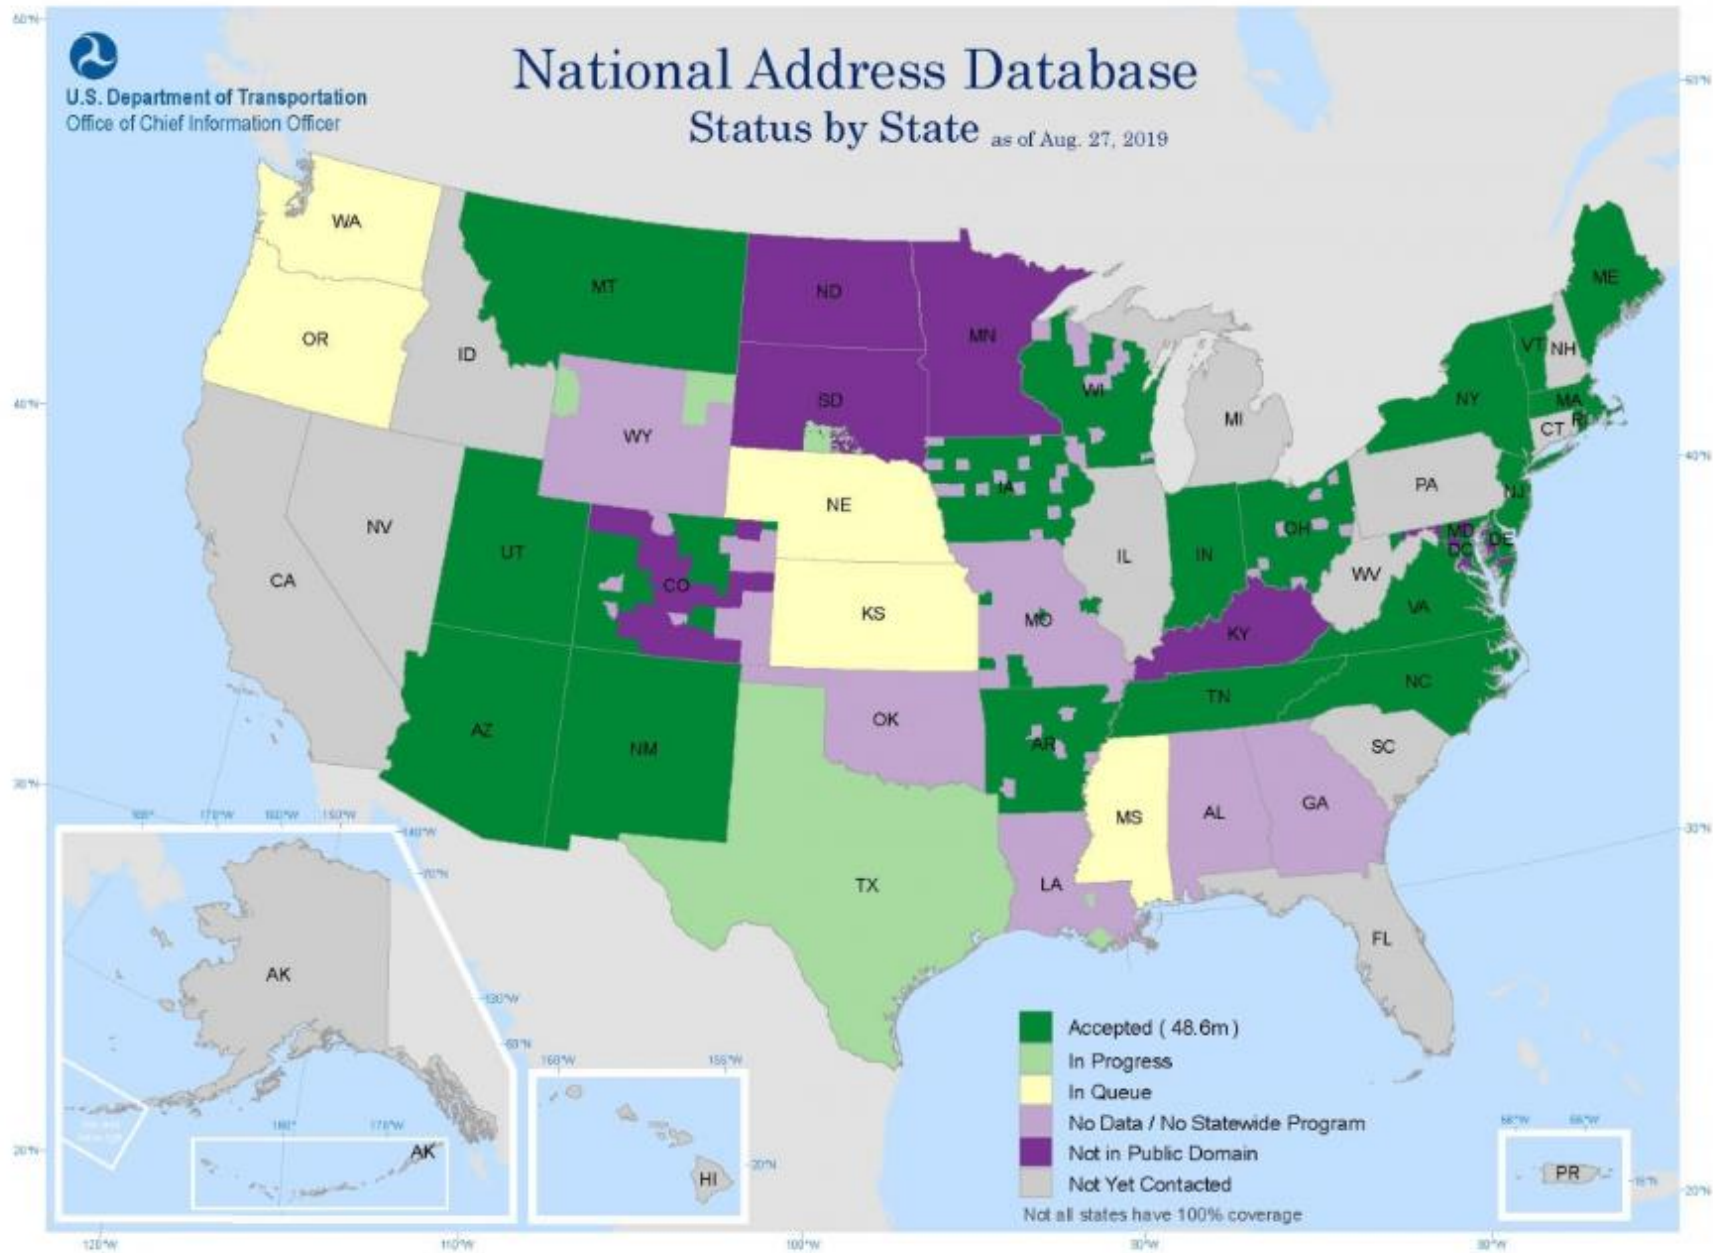

- **National Address Database (NAD) is maintained by the US Department of Transportation.**
- **NC is currently represented with the 2014 AddressNC dataset.**
- **NC is considering providing a partial update with a subset of data extracted from the Next Generation 911 statewide Site Structure Address Points (SSAP) layer.**
  - **Subset would include counties that have met the requirements for the Next Generation 911 project – “i3 Ready”.**
  - **17 counties meet these requirements.**

# NAD Update Next Steps

- **Coordinate with US DOT to determine their requirements.**
- **Prepare Next Generation 911 statewide SSAP layer.**
  - **Extract counties that meet i3 Readiness.**
  - **Remove superfluous fields.**
  - **Add NAD required fields, populate with associated information.**
  - **Create metadata record.**
- **Provide data to US DOT NAD.**

# AddressNC Update Summary

- **By next quarterly SMAC meeting**
  - **Better idea of scope, milestones, and timeline for updated AddressNC layer.**
  - **Potential draft schema to propose.**
  - **Update on data provided for NAD update.**

# Thank you!
